Atabak Nikouseresht

Junior Financial Risk Analyst

Bologna, Italy (Open to relocate) | +39 344 561 7780 | atabak.nikouseresht@gmail.com
linkedin.com/in/atabak-nikouseresht | github.com/Atabak-Nikouseresht

MSc student in Applied Economics and Markets with practical experience in **market feasibility analysis** and quantitative financial-data projects. Apply **Python, SQL and econometric methods** to fraud analytics, temporal model evaluation and portfolio analysis. Currently working on AI-assisted knowledge workflows and economic-financial project assessment. Seeking junior financial risk, fraud analytics or model validation roles.

Experience

Curricular Intern — Economic Analysis & AI Workflows
Fondazione Yunus Italia — ETS | Oct 2026 – Present
• Support AI-assisted knowledge organization and document workflows for EU project activities.
• Contribute to economic-financial feasibility screening; internship ongoing.

Market Study & Feasibility Intern
NIK Servat | Oct 2023 – Mar 2024
• Assessed market size, competition and risk factors for investment and financing feasibility reports.
• Prepared market comparisons and Excel-based analysis for feasibility assessments.

Blockchain & Cryptocurrency Instructor
Forency Group | Aug 2021 – Feb 2022
• Delivered training on blockchain, digital assets and financial technology for non-technical learners.

Education

MSc in Applied Economics and Markets
University of Bologna | Oct 2024 – Present
Track: Financial and Monetary Economics
Selected coursework: Portfolio Theory (30/30 cum laude), Python for Economists (29/30), Time Series Econometrics, Macrofinance and Derivatives.

BSc in Economics
Ferdowsi University of Mashhad | Sep 2019 – Jul 2023
Focus: Banking & Financial Economics; Behavioral Economics | GPA: 17.94/20

Projects

Investment Deflator Inflation — Econometric Analysis (ARDL & VAR)
• Collaborative university report examining investment-deflator inflation and price dynamics.
• Applied ADF, ARDL, VAR and cointegration methods; interpretation limits documented in errata.
GitHub Project

Fraud Detection Model & Streamlit App (Python)
• Developed a local transaction-input interface for a saved scikit-learn fraud classifier.
• Documented reproducible setup and tests; legacy model performance is not independently validated.
GitHub Project

Education & High-Skill Employment — Econometric Analysis (IPUMS NL 2011)
• Co-authored a study of educational attainment and high-skill occupations using Dutch microdata.
• Compared OLS linear-probability and logit models; identified associations, not causal effects.
GitHub Project

IEEE-CIS Fraud Detection — Temporal ML Evaluation
• Compared Logistic Regression and XGBoost on 590,540 transaction records with chronological splits.
• XGBoost held-out ROC-AUC 0.887546; average precision 0.480197, with documented limitations.
GitHub Project

Skills

Risk & Finance: Fraud risk analytics, financial risk assessment, portfolio theory, feasibility studies, Excel
Data & Programming: Python (pandas, NumPy, scikit-learn, XGBoost), SQL, Stata, Streamlit, Git
Econometrics & Time Series: Regression, ARDL, VAR, cointegration, temporal validation, calibration

Certifications

Google Data Analytics (Foundations • Ask Questions • Prepare Data • Process Data) • IBM Introduction to Data Analytics • Kaggle Python • Data Science (Ferdowsi University) • Python Programming (Toplearn) • IBM Blockchain Essentials V2

Languages

Persian – Native proficiency | **English** – Full professional proficiency | **Italian** – Elementary proficiency
